INFECTION CONTROL PROTOCOLS

Our office is doing everything we can to provide a safe environment for patients, families and staff members. Staff members are required to have their temperatures taken prior to each shift to ensure only healthy staff members are working with your families. We are also required to wear appropriate PPE at all times. **In addition, our offices are equipped with IQAir, a hospital-grade air purifier that capture microorganisms as small as COVID-19.**

Here are some helpful steps our patients and their family members are able to take part in to help keep everyone safe!:

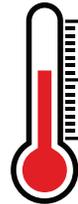

Fill out any necessary paperwork online prior to your child's appointment at [USmiles.com](https://www.usmiles.com). Click on **New Patient > Patient Forms > New Patient Registration**.

While treatments are not in progress, maintain at least 6 ft. distance from all other patients and staff members.

Upon arrival, wait in your car. Call or text us at 516-541-9396 to let us know you are here. Our office will call you when your child is ready to be seen!

All patients temperatures will be taken and recorded prior to treatment.

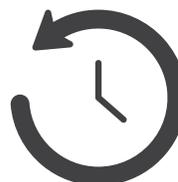

We ask all parents to send their children in for their appointment with a mask and by themselves. Our staff will be happy to escort them from and to your car.

Note that our offices have been cleared of video games, books and toys to limit exposure during the pandemic.

Upon entering the office, you and your child will be directed to wash hands thoroughly for at least 20 seconds.

If your child or another member of your household has been sick at any point in the last 2 weeks, we require that appointments be rescheduled.

Each patient will also be asked to rinse with an antiseptic mouthwash to kill virus and bacteria.

Stay rest-assured that exposed surfaces are sanitized throughout the day and all treatment rooms are thoroughly cleaned between every patient.
